LEAK DETECTION / LOCATION SURVEY REPORT

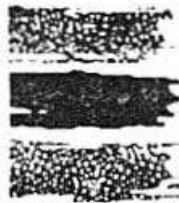

FOR

BEXAR METROPOLITAN WATER DISTRICT

NORTHEAST / NORTHWEST

SAN ANTONIO, TEXAS

MARCH 21, 1994 - FEBRUARY 24, 1995

EDWARDS UNDERGROUND
WATER DISTRICT

6.25-7.5

May 4, 1995

Mr. Thomas C. Moreno
General Manager
Bexar Metropolitan Water District
2706 W. Southcross
San Antonio, Texas 78211-0577

Dear Mr. Moreno:

We are pleased to submit this final report of the leak detection survey performed on the Bexar Metropolitan Water District's Northeast and Northwest water distribution systems. This report lists findings by separate categories for your convenience.

The Edwards Underground Water District (District) appreciates the cooperation and assistance you have provided during the survey. Special thanks to Nick Rodriguez, Jimmy DeLoach, Larry Beetle and their staffs for their attention and patience during the survey. The District hopes that the information provided herein will be beneficial to the Bexar Metropolitan Water District in identifying and targeting areas of actual water loss and potential water loss.

This survey has demonstrated the water saving potential of the Leak Detection Program. Maintaining the best possible program is vital in order to continue the successes realized. For this reason, the District is soliciting your comments, both positive and negative, and any suggestions you may have on how to improve our program.

Please respond to this request candidly, as the District cannot improve on deficiencies or support positive measures without the knowledge of such conditions.

During this survey, BMWD and EUWD leak detection staff was able to work together for the first time. This partnership allowed both staffs to share

experiences, evaluate different techniques and discuss problems common to leak detection programs. Our staff developed a very positive image of the BMWD program and found these sessions to be both informative and productive. If your staff should require leak detection assistance in the future, the District can provide assistance and support.

As always, it was a pleasure to work with you and your staff. Should you require leak detection assistance on any future water system acquisitions or additional information regarding this report, please call.

Sincerely,

Charles E. Ahrens

ENCLOSURES TO REPORT

- A. Revised Master Water System Distribution Plats

SUMMARY

On March 15, 1994, the Edwards Underground Water District (EUWD) received a request from the Bexar Metropolitan Water District (BMWD) to perform a leak detection / location survey on their two newly acquired water systems. These systems were formerly owned and operated by the Lackland City Water Company. A pre-survey conference was held March 15, 1994 at the BMWD Service Center to discuss the work to be performed. It was agreed that EUWD would perform sonic leak detection on all available access points and computerized leak location as needed. A final report, including any unusual system condition found and an updated master water plat would be submitted to BMWD at the conclusion of the survey.

Mark L. McGinnis of EUWD began the survey of the Northwest system on March 23, 1994. The Northeast system survey was started on April 11, 1994 by John E. Gapinski of EUWD. The Northeast survey was concluded on February 3, 1995 followed by the Northwest survey that was concluded on February 24, 1995. Over the course of the survey, EUWD surveyed a total of 22,319 access points including 18,239 customer service connections, 898 fire hydrants, 1,855 valves, and 207 other access points covering 175.93 miles of distribution main. Computers leak sound correlation was performed on 17 locations by EUWD and numerous other locations by BMWD personnel.

EUWD surveyors detected a total of 741 leaks. This total included 194 service leaks, 137 meter box leaks, 27 main line leaks, 22 fire hydrant leaks, 10 main valve leaks, and 351 customer side leaks. EUWD estimates 559,797 gallons of water per day has been saved by the repair of 387 detected leaks as of March 17, 1995. The leaks discovered during the survey range from 54,864 gallons per day to numerous small meter box leaks.

As part of the survey, EUWD located 340 valves of various types, 90 fire hydrants, and 59,385 feet of main not shown on the master water plats. EUWD surveyors were unable to locate 287 service connections, 171 valves of various types, and 2 fire hydrants shown on the master water plats. An additional 196 items were discovered to need some type of repair or adjustment.

DISCUSSION

A. Total Access Points Surveyed: 22,319

Northeast: 12,124

Northwest: 10,195

The following is an outline of the various access points used during the survey:

	<u>Northeast</u>	<u>Northwest</u>	<u>Subtotal</u>
1. Customer service connections:	9,931	8,308	18,239
2. Main valves:	1,554	1,321	2,875
3. Fire hydrants:	438	460	898
4. Others:	201	106	307

B. Total Miles of Distribution Main Surveyed: 175.93

Northeast: 94.25

Northwest: 81.68

C. Total Leaks Detected: 741

Northeast: 515

Northwest: 226

Main line, service line, fire hydrant, and valve leaks were located by computer correlation of leak sounds or by visual inspection. Meter box leaks and customer side leaks were located through house to house surveying.

	<u>Northeast</u>	<u>Northwest</u>	<u>Subtotal</u>
1. Valves:	7	3	10
2. Meter Box:	78	59	137
3. Fire Hydrant:	15	7	22
4. Service:	166	28	194
5. Mains:	17	10	27
Subtotal:	<u>283</u>	<u>107</u>	<u>390</u>
6. Customer Side:	232	119	351
Total:	<u>515</u>	<u>226</u>	<u>741</u>

A detailed listing of these leaks is recorded in appendices A through F. Separate appendices are provided for both systems and each category of leak.

D. Detected Leaks Not Repaired, As of April 25, 1995: 3

Northeast: 1
Northwest: 2

E. Total Estimated Water Saved by Repair of Detected Leaks in Gallons Per Day as of April 25, 1995: 559,797

Northeast: 422,393
Northwest: 137,404

Leakage estimates for main line, service line, fire hydrants, and valve leaks are based on hole size and system pressure in pressure per square inch. This information was furnished by BMWD personnel when EUWD was not on site at the time of repair. Totals are only recorded for leaks repaired as of April 25, 1995 with estimates.

	<u>Northeast</u>	<u>Northwest</u>	<u>Subtotal</u>
Valves:	12,289	2,902	15,191
Meter Box:	4,291	613	4,904
Fire Hydrants:	7,520	1,920	9,440
Service:	137,927	18,857	156,784
Main:	260,366	113,112	373,478

Customer leaks were generally small. No attempt was made to estimate this leakage. Customers were notified by doortag or in person when possible or will be notified by BMWD personnel.

F. Field Survey Findings Vs. Master Water Plats.

1. Water system access points that could not be located: 460

	<u>Northeast</u>	<u>Northwest</u>	<u>Subtotal</u>
Main Line Valves:	46	40	86
Blow Off Valves:	41	33	74
Fire Hydrant Valves:	3	8	11
Fire Hydrants:	2	0	2
Service Connections:	197	90	287

Suspected locations were surveyed by EUWD with a ferromagnetic detector to locate buried valves. When successful, these locations were marked. It is conceivable that additional valves remain unlocated within the system. All valves box lids located were painted red.

A list of these items are included in appendix J.

2. Valves located, but not shown on plats: 341

	<u>Northeast</u>	<u>Northwest</u>	<u>Subtotal</u>
Main Line Valves:	184	81	265
Blow Off Valves:	28	5	33
Pressure Regulating Valves:	2	3	5
Fire Hydrant Valves:	4	2	6
Service Valves:	17	11	28
Fire Line Valves:	1	1	2
Back Flow Preventor:	1	1	2

A list of these valves is included in appendix G.

3. Feet of main located, but not shown on plats: 59,385

Northeast: 45,470'

Northwest: 13,915'

A list of main footage's is included in appendix H.

4. Fire hydrants located, but not shown on plats: 90

Northeast: 55

Northwest: 35

A list of these fire hydrants is included in appendix I.

G. Miscellaneous Maintenance Needed

1. Raise To Grade: 149

	<u>Northeast</u>	<u>Northwest</u>	<u>Sub Total</u>
Main Valve:	37	27	64
Blow Off Valve:	26	13	39
Fire Hydrant Valve:	6	12	18
Service:	2	26	28

2. Repair Needed: 47

	<u>Northeast</u>	<u>Northwest</u>	<u>Subtotal</u>
Main Valve:	9	9	18
Blow Off Valve:	0	4	4
Fire Hydrant Valve:	2	5	9
Curb Stop:	3	0	3
Meter Box:	3	0	3
Missing Lids:	8	2	10

A list of these items is included in appendix K.

3. Cleaning Needed: 20

Main Valve:	8	5	13
Blow Off Valve:	1	1	2
Fire Hydrant Valve:	5	0	5

A list of these items is included in Appendix M.

H. Revisions To The Master Water System Distribution Plats Included With This Report

The 142 pages of Bexar Metropolitan Water District water system distribution plats used in these surveys have been grouped into two sections. One section for the Northeast and one for the Northwest section.

Distribution and transmission mains added to plats were field measured from access point to access point. Main line size and material types were furnished by BMWD personnel.

Abbreviations Used on the Revised Distribution System Plats:

UTL	--	Unable To Locate
NC	--	Needs Cleaning
RTG	--	Raise To Grade
ARV	--	Air Relief Valve
PRV	--	Pressure Regulating Valve
BFP	--	Back Flow Preventor
NR	--	Needs Repair
FHWV	--	Fire Hydrant With Valve
FH	--	Fire Hydrant Without Valve

All mains were surveyed from all available access points.

All valves located were surveyed. When direct contact could not be made, a probe rod was used.

Fire hydrants labeled as fire hydrants without lead valves are hydrants where the lead valve could not be located or does not exist.

Any item circled and highlighted in yellow on the plats indicates that it was added, could not be located, or needs repair. All items are labeled on the plats.

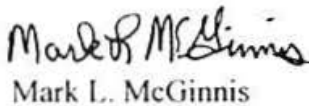

All mains, fire hydrants, water services, and valves added to the plats are for access point accounting. The location and placement of these items on the plats are intended to indicate what was actually found during the field survey. Placement of main valves on the plat is the surveyor's best guess of what they control. Every effort was made to ensure the accuracy of these plats, but EUWD does not guarantee their accuracy.

RECOMMENDATIONS AND COMMENTS

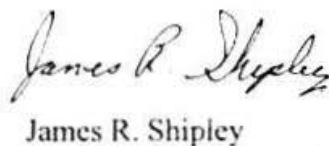

- I. Revise master water distribution plats from "As built" plans, EUWD plats, and utilizing the knowledge and expertise of long term field employee. Master plats should show locations of all main valves, fire hydrants, blow off valves, drain or flush valves, air relief valves, and pressure regulating valves. Revised plats should be made available to field maintenance supervisors for use in the operation and maintenance of the water distribution system.
- II. Implement an ongoing in-house main line valve preventive maintenance program. Inspection and operation of all system valves should be performed on a routine basis. All distribution system valves should be located, cleaned, sounded for leakage, tested, repaired or replaced as needed. The use of valve markers is recommended on valves subject to being lost or buried.
- III. Easements or rights-of-way on cross country mains should be cleared, mowed, and maintained to expedite leak repair and allow access by utility personnel for routine visual inspection.
- IV. A thorough evaluation of the water distribution systems air relief needs should be conducted. Air relief valves should be located, inspected, repaired, replaced, or installed as needed.
- V. Review the existing water distribution system and planned water system improvements to ensure sufficient access points are in place to facilitate future leak detection/ location surveys.
- VI. We are continually impressed by the pride and professionalism exhibited by all members of the BMWD staff. The quality workmanship and efficiency displayed by the staff reaffirmed the high standards we have come to expect from Bexar Metropolitan Water District. The successful partnership we have established has once again saved a significant amount of precious water and benefited all citizens of the Edwards Aquifer region. The Edwards Underground Water District appreciates the water conservation efforts and recognizes the high level of cooperation provided by BMWD. Please convey our commendations and thanks to Edward Hernandez, Fred Alderete, and their staff for their diligence in helping to conserve the Edwards Aquifer.
