CHAPTER 626

S.B. No. 1477

AN ACT

relating to the creation, administration, powers, duties, operation, and financing of the Edwards Aquifer Authority and the management of the Edwards Aquifer; granting the power of eminent domain; authorizing the issuance of bonds; providing civil and administrative penalties; and validating the creation of the Uvalde County Underground Water Conservation District.

Be it enacted by the Legislature of the State of Texas:

ARTICLE 1

SECTION 1.01 FINDINGS AND DECLARATION OF POLICY.

The legislature finds that the Edwards Aquifer is a unique and complex hydrological system, with diverse economic and social interests dependent on the aquifer for water supply. In keeping with that finding, the Edwards Aquifer is declared to be a distinctive natural resource in this state, a unique aquifer, and not an underground stream. To sustain these diverse interests and that natural resource, a special regional management district is required for the effective control of the resource to protect terrestrial and aquatic life, domestic and municipal water supplies, the operation of existing industries, and the economic development of the state. Use of water in the district for beneficial purposes requires that all reasonable measures be taken to be conservative in water use.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.01, 1993 Tex. Gen. Laws 2350.

SECTION 1.02 CREATION.

(a) A conservation and reclamation district, to be known as the Edwards Aquifer Authority, is created in all or part of Atascosa, Bexar, Caldwell, Comal, Guadalupe, Hays, Medina, and Uvalde counties. A confirmation election is not necessary. The authority is a governmental agency and a body politic and corporate.

(b) The authority is created under and is essential to accomplish the purposes of Article XVI, Section 59, of the Texas Constitution.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.02, 1993 Tex. Gen. Laws 2350, 2351.

SECTION 1.03 DEFINITIONS.

In this article:

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.04, 1993 Tex. Gen. Laws 2350, 2353-55; as amended by Act of May 21, 2009, 81st Leg., R.S., ch. 1080, 2009 Tex. Gen. Laws 2818-25.

SECTION 1.05 FINDINGS RELATING TO BOUNDARIES.

The legislature finds that the boundaries and field notes of the authority form a closure. A mistake in the field notes or in copying the field notes in the legislative process does not affect the organization, existence, or validity of the district or the legality or operation of the district or its governing body.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.05, 1993 Tex. Gen. Laws 2350, 2355.

SECTION 1.06 FINDING OF BENEFIT.

(a) The legislature finds that the water in the unique underground system of water-bearing formations known as the Edwards-Balcones Fault Zone Aquifer has a hydrologic interrelationship to the Guadalupe, San Antonio, San Marcos, Comal, Frio, and Nueces river basins, is the primary source of water for the residents of the region, and is vital to the general economy and welfare of this state. The legislature finds that it is necessary, appropriate, and a benefit to the welfare of this state to provide for the management of the aquifer through the application of management mechanisms consistent with our legal system and appropriate to the aquifer system.

(b) The legislature further finds that the state will be benefited by exercise of the powers of the authority and by the works and projects that are to be accomplished by the authority under powers conferred by Article XVI, Section 59, of the Texas Constitution. The authority is created to serve a public use and benefit.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.06, 1993 Tex. Gen. Laws 2350, 2355-56.

SECTION 1.07 OWNERSHIP OF UNDERGROUND WATER.

The ownership and rights of the owner of the land and the owner's lessees and assigns, including holders of recorded liens or other security interests in the land, in underground water and the contract rights of any person who purchases water for the provision of potable water to the public or for the resale of potable water to the public for any use are recognized. However, action taken pursuant to this Act may not be construed as depriving or divesting the owner or the owner's lessees and assigns, including holders of recorded liens or other security interests in the land, of these ownership rights or as impairing the contract rights of any person who purchases water for the provision of potable water to the public or for the resale of potable water to the public for any use, subject to the rules adopted by the authority under this Act or a district exercising the powers provided by Chapter 36, Water Code. The legislature intends that just compensation be paid if implementation of this article causes a taking of private property or the impairment of a contract in contravention of the Texas or federal constitution.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.07, 1993 Tex. Gen. Laws 2350, 2356; as amended by Act of May 23, 2019, 86th Leg., R.S., ch. 1135, § 2, 2019 Tex. Gen. Laws 3213.

SECTION 1.08 GENERAL POWERS.

(a) The authority has all of the powers, rights, and privileges necessary to manage, conserve, preserve, and protect the aquifer and to increase the recharge of, and prevent the waste or pollution of water in, the aquifer. The authority has all of the rights, powers, privileges, authority, functions, and duties provided by the general law of this state, including Chapters 49 and 51, Water Code, applicable to an authority created under Article XVI, Section 59, of the Texas Constitution. This article prevails over any provision of general law that is in conflict or inconsistent with this article regarding the area of the authority's jurisdiction. Chapter 36, Water Code, does not apply to the authority.

(b) The authority's powers regarding underground water apply only to underground water within or withdrawn from the aquifer. This subsection is not intended to allow the authority to regulate surface water.

(c) The authority and local governments with pollution control powers provided under Subchapters D and E, Chapter 26, Water Code, in order to prevent pollution and enforce water quality standards in the counties included within the authority's boundaries and within a buffer zone that includes all of the area less than five miles outside of those counties, shall apply pollution control regulations equally and uniformly throughout the area within the counties and the buffer zone. The buffer zone does not include the territory within a water management district created under Chapter 654, Acts of the 71st Legislature, Regular Session, 1989.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.08, 1993 Tex. Gen. Laws 2350, 2356; as amended by Act of May 23, 2019, 86th Leg., R.S., ch. 1135, § 3, 2019 Tex. Gen. Laws 3213-14.

SECTION 1.081 FIRE CONTROL.

To protect the water quality of the aquifer, the board shall adopt rules regarding the control of fires in the aquifer's recharge zone. In adopting rules under this section, the board shall consult with fire departments and fire marshals with jurisdiction over the recharge zone.

Act of May 23, 2007, 80th Leg., R.S., ch. 510, 2007 Tex. Gen. Laws 900.

SECTION 1.09 BOARD OF DIRECTORS; ELECTIONS; TERMS.

(b) The board shall order elections of the appropriate number of directors to replace directors holding elected offices whose terms are nearest expiration to be held on the uniform election date in November of each even-numbered year.

(c) If a director's position becomes vacant for any reason, the board shall appoint a qualified person to serve until the first election of directors following the appointment. If the position is not scheduled to be filled at that election, the board shall provide for a director to be elected at that election to serve in the position for the remainder of the unexpired term.

(d) Section 41.008, Election Code, does not apply to an election held under this article.

(e) At the initial meeting of the board following an election of new directors, the directors shall elect a presiding officer and other necessary officers. Officers serve terms set by rule of the board not to exceed two years.

(f) An act of the board is not valid unless adopted by the affirmative vote of a majority of the directors who are entitled to vote when a quorum is present. For purposes of this subsection, eight directors who are entitled to vote constitute a quorum.

(g) A director receives no compensation for service on the board but is entitled to reimbursement for actual and necessary expenses incurred in the performance of the director's duties.

(h) An elected director shall hold office until a successor has been elected and has qualified by taking the oath of office.

(i) A member of a governing body of another political subdivision is ineligible for appointment or election as a director of the authority. A director of the authority is disqualified and vacates the office of director if the director is appointed or elected as a member of the governing body of another political subdivision.

(j) For liability purposes only, a director of the authority is considered an employee of the authority under Chapter 101, Civil Practice and Remedies Code, even if the director does not receive fees of office voluntarily, by authority policy, or through a statutory exception.

(k) A director of the authority is immune from suit and immune from liability for official votes and official actions. To the extent an official vote or official action conforms to laws relating to conflicts of interest, abuse of office, or constitutional obligations, this subsection provides immunity for those actions.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.09, 1993 Tex. Gen. Laws 2350, 2356; as amended by Act of May 29, 1995, 74th Leg., R.S., ch. 261, § 1, 1995 Tex. Gen. Laws 2505-06; Act of May 23, 2019, 86th Leg., R.S., ch. 1135, § 4, 2019 Tex. Gen. Laws 3213, 3214.

A nonvoting director appointed by the Commissioners Court of Medina County must be a resident of Medina County, and a nonvoting director appointed by the Commissioners Court of Uvalde County must be a resident of Uvalde County. If the office of a director appointed under this section becomes vacant for any reason, the office shall be filled by appointment as provided by Subsection (b) or (c) of this section, as appropriate, for the unexpired portion of the term.

(e) A director appointed under this section is entitled to participate in and comment on any matter before the board in the same manner as a voting director, except that a director appointed under this section may not vote on any matter before the board.

(f) A director appointed under this section is not entitled to compensation for service on the board but is entitled to reimbursement for actual and necessary expenses incurred in performing the director's duties.

amended by Act of May 27, 2001, 77th Leg., R.S., ch. 966, § 6.02, 2001 Tex. Gen. Laws 1991, 2075.

SECTION 1.16 DECLARATIONS OF HISTORICAL USE; INITIAL REGULAR PERMITS.

(a) An existing user may apply for an initial regular permit by filing a declaration of historical use of underground water withdrawn from the aquifer during the historical period from June 1, 1972, through May 31, 1993.

(b) An existing user's declaration of historical use must be filed on or before March 1, 1994, on a form prescribed by the board. An applicant for a permit must timely pay all application fees required by the board. An owner of a well used for irrigation must include additional documentation of the number of acres irrigated during the historical period provided by Subsection (a) of this section.

(c) An owner of a well from which the water will be used exclusively for domestic use or watering livestock and that is exempt under Section 1.33 of this article is not required to file a declaration of historical use.

(d) The board shall grant an initial regular permit to an existing user who:

(1) files a declaration and pays fees as required by this section; and

(2) establishes by convincing evidence beneficial use of underground water from the aquifer.

(e) To the extent water is available for permitting, the board shall issue the existing user a permit for withdrawal of an amount of water equal to the user's maximum beneficial use of water without waste during any one calendar year of the historical period. If a water user does not have historical use for a full year, then the authority shall issue a permit for withdrawal based on an amount of water that would normally be beneficially used without waste for the intended purpose for a calendar year. If the total amount of water determined to have been beneficially used without waste under this subsection exceeds the amount of water available for permitting, the authority shall adjust the amount of water authorized for withdrawal under the permits proportionately to meet the amount available for permitting. An existing irrigation user shall receive a permit for not less than two acre-feet a year for each acre of land the user actually irrigated in any one calendar year during the historical period. An existing user who has operated a well for three or more years during the historical period shall receive a permit for at least the average amount of water withdrawn annually during the historical period.

(f) The board by rule shall consider the equitable treatment of a person whose historic use has been affected by a requirement of or participation in a federal program.

(g) The authority shall issue an initial regular permit without a term, and an initial regular permit remains in effect until the permit is abandoned or cancelled.

(h) The board shall notify each permit holder that the permit is subject to limitations as provided by this article.

SECTION 1.17 INTERIM AUTHORIZATION.

(a) A person who, on the effective date of this article, owns a producing well that withdraws water from the aquifer may continue to withdraw and beneficially use water without waste until final action on permits by the authority, if:

(1) the well is in compliance with all statutes and rules relating to well construction, approval, location, spacing, and operation; and

(2) by March 1, 1994, the person files a declaration of historical use on a form as required by the authority.

(b) Use under interim authorization may not exceed on an annual basis the historical, maximum, beneficial use of water without waste during any one calendar year as evidenced by the person's declaration of historical use calculated in accordance with Subsection (e) of Section 1.16 of this article, unless that amount is otherwise determined by the authority.

(c) Use under this section is subject to the authority's comprehensive management plan and rules adopted by the authority.

(d) Interim authorization for a well under this section ends on:

(1) entry of a final and appealable order by the authority acting on the application for the well; or

(2) March 1, 1994, if the well owner has not filed a declaration of historical use.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.17, 1993 Tex. Gen. Laws 2350, 2361.

SECTION 1.18 ADDITIONAL REGULAR PERMITS.

(a) To the extent water is available for permitting after the issuance of permits to existing users, the authority may issue additional regular permits, subject to limits on the total amount of permitted withdrawals determined under Section 1.14 of this article.

(b) The authority may not consider or take action on an application relating to a proposed or existing well of which there is no evidence of actual beneficial use before June 1,

1993, until a final determination has been made on all initial regular permit applications submitted on or before the initial application date of March 1, 1994.

SECTION 1.19 TERM PERMITS.

(a) The authority may issue interruptible term permits for withdrawal for any period the authority considers feasible, but may not issue a term permit for a period of more than 10 years.

(b) Withdrawal of water under a term permit must be consistent with the authority's critical period management plan established under Section 1.26 of this article. A holder of a term permit may not withdraw water from the San Antonio pool of the aquifer unless:

(1) the level of the aquifer is higher than 675 feet above sea level, as measured at Well J-17;

(2) the flow at Comal Springs as determined by Section 1.26(c) of this article is greater than 350 cubic feet per second; and

(3) the flow at San Marcos Springs as determined by Section 1.26(c) of this article is greater than 200 cubic feet per second.

(c) A holder of a term permit may not withdraw water from the Uvalde pool of the aquifer unless the level of the aquifer is higher than 865 feet above sea level, as measured at Well J-27.

(b) On receipt of a timely written request, the board shall make written findings of fact and conclusions of law regarding a decision of the board on an application under this Act. The board shall provide certified copies of the findings and conclusions to the person who requested them, and to each designated party, not later than the 20th day after the date the board receives the request. A party to a contested hearing may request a rehearing before the board not later than the 20th day after the date the board issues the findings and conclusions.

(c) A request for rehearing must be filed in the authority's office and must state the grounds for the request.

(d) If the board grants a request for rehearing, the board shall schedule the rehearing not later than the 45th day after the date the request is granted.

(e) The failure of the board to grant or deny a request for rehearing before the 91st day after the date the request is submitted is a denial of the request.

SECTION 1.211 DECISION; WHEN FINAL.

- (a) A decision by the board on an application under this Act is final:
 - (1) if a request for rehearing is not filed on time, on the expiration of the period for filing a request for rehearing; or
 - (2) if a request for rehearing is filed on time, on the date:
 - (A) the board denies the request for rehearing; or
 - (B) the board renders a written decision after rehearing.
- (b) A timely filed motion for rehearing is a prerequisite to a suit against the authority under Section 1.46 of this article challenging a decision in a contested hearing. A suit under Section 1.46 must be filed not later than the 60th day after the date on which the decision becomes final.

 - (1) holding those rights in trust for sale or transfer of the water or the rights to persons within the authority's jurisdiction who may use water from the aquifer;
 - (2) holding those rights in trust as a means of managing overall demand on the aquifer; or
 - (3) holding those rights for resale.
- (b) The authority may acquire and hold permits or rights to appropriate surface water or groundwater from sources inside or outside of the authority's boundaries.
- (c) Notwithstanding any other provisions of law, the authority's acquisition of permitted rights to use water from the aquifer is eligible for financial assistance from:

SECTION 1.23 CONSERVATION AND REUSE PLANS.

(a) The authority may require holders of regular permits and holders of term permits to submit water conservation plans and, if appropriate, reuse plans for review and approval by the authority. The board by rule shall require a plan to be implemented after a reasonable time after a plan's approval.

(b) The board shall assist users in developing conservation or reuse plans.

(c) The authority biennially shall prepare and update enforceable and effective conservation and reuse plans as required by this article. Not later than January 1 of each odd-numbered year the authority shall submit the plan to the legislature.

(b) The authority may apply for, request, solicit, contract for, receive, and accept gifts, grants, and other assistance from any source for the purposes of this article.

(c) The authority may issue grants or make loans to finance the purchase or installation of equipment or facilities. (a) Consistent with Section 1.14 of this article, the authority shall develop, by September 1, 1995, and implement a comprehensive water management plan that includes conservation, future supply, and demand management plans. The authority may not delegate the development of the plan under Section 1.42 of this article.

(b) *Repealed by Act of May 23, 2019, 86th Leg., R.S., ch. 1135, § 15, § 1.25(b), 2019 Tex. Gen. Laws 3213, 3218.*

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.25, 1993 Tex. Gen. Laws 2350, 2363; as amended by Act of May 23, 2019, 86th Leg., R.S., ch. 1135, § 15, § 1.25(b), 2019 Tex. Gen. Laws 3213, 3218.

SECTION 1.26 CRITICAL PERIOD MANAGEMENT PLAN.

(a) The authority by rule shall adopt a critical period management plan consistent with Sections 1.14(a), (f), and (h) of this article. The plan must allow irrigation use to continue in order to permit the user to complete the irrigation of a crop in progress.

(b) In this section, “MSL” means the elevation above mean sea level, measured in feet, of the surface of the water in a well, and “CFS” means cubic feet per second. Not later than January 1, 2008, the authority shall, by rule, adopt and enforce a critical period management plan with withdrawal reduction percentages in the amounts indicated in Tables 1 and 2 whether according to the index well levels or the Comal or San Marcos Springs flow as applicable, for a total in critical period Stage IV of 40 percent of the permitted withdrawals under Table 1 and 35 percent under Table 2:

TABLE 1 – CRITICAL PERIOD WITHDRAWAL REDUCTION STAGES FOR THE SAN ANTONIO POOL				
COMAL SPRINGS FLOW CFS	SAN MARCOS SPRINGS FLOW CFS	INDEX WELL J-17 LEVEL MSL	CRITICAL PERIOD STAGE	WITHDRAWAL REDUCTION – SAN ANTONIO POOL
<225	<96	<660	I	20%
<200	<80	<650	II	30%
<150	N/A	<640	III	35%
<100	N/A	<630	IV	40%

TABLE 2 – CRITICAL PERIOD WITHDRAWAL REDUCTION STAGES FOR THE UVALDE POOL		
WITHDRAWAL REDUCTION- UVALDE POOL	INDEX WELL J-27 LEVEL MSL	CRITICAL PERIOD STAGE
N/A	N/A	I
5%	<850	II
20%	<845	III
35%	<842	IV

(c) A change to a critical period stage with higher withdrawal reduction percentages is triggered if the 10-day average of daily springflows at the Comal Springs or the San Marcos Springs or the 10-day average of daily aquifer levels at the J-17 Index Well drops below the

lowest number of any of the trigger levels indicated in Table 1. A change to a critical period stage with lower withdrawal reduction percentages is triggered only when the 10-day average of daily springflows at the Comal Springs and the San Marcos Springs and the 10-day average of daily aquifer levels at the J-17 Index Well are all above the same stage trigger level. The authority may adjust the withdrawal percentages for Stage IV in Tables 1 and 2 if necessary in order to comply with Subsection (d) or (e) of this section.

(d) Beginning September 1, 2007, the authority may not require the volume of permitted withdrawals to be less than an annualized rate of 340,000 acre-feet, under critical period Stage IV.

(e) After January 1, 2013, the authority may not require the volume of permitted withdrawals to be less than an annualized rate of 320,000 acre-feet, under critical period Stage IV unless, after review and consideration of the recommendations provided under Section 1.26A of this article, the authority determines that a different volume of withdrawals is consistent with Sections 1.14(a), (f), and (h) of this article in maintaining protection for federally listed threatened and endangered species associated with the aquifer to the extent required by federal law.

(f) Notwithstanding Subsections (d) and (e) of this section, the authority may require further withdrawal reductions before reviewing and considering the recommendations provided under Section 1.26A of this article if the discharge of Comal Springs or San Marcos Springs declines an additional 15 percent after Stage IV withdrawal reductions are imposed under Subsection (b) of this section. This subsection expires on the date that critical period management plan rules adopted by the authority based on the recommendations provided under Section 1.26A of this article take effect.

(g) Notwithstanding the existence of any stage of an interim or final critical period adopted by the authority under this section, a person authorized to withdraw groundwater from the aquifer for irrigation purposes shall, without regard to the withdrawal reductions prescribed for that stage, be allowed to finish a crop already planted in the calendar year during which the critical period is in effect.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.26, 1993 Tex. Gen. Laws 2350, 2363-64; as amended by Act of May 28, 2007, 80th Leg., R.S., ch. 1351, § 2.06, 2007 Tex. Gen. Laws 4612, 4628-30; Act of May 28, 2007, 80th Leg., R.S., ch. 1430, § 12.06, 2007 Tex. Gen. Laws 5848, 5903-04; Act of May 23, 2019, 86th Leg., R.S., ch. 1135, § 7, 2019 Tex. Gen. Laws 3213, 3215.

SECTION 1.26A DEVELOPMENT OF WITHDRAWAL REDUCTION LEVELS AND STAGES FOR CRITICAL PERIOD MANAGEMENT THROUGH RECOVERY IMPLEMENTATION PROGRAM.

(a) The authority, with the assistance of Texas A&M University, shall cooperatively develop a recovery implementation program through a facilitated, consensus-based process that involves input from the United States Fish and Wildlife Service, other appropriate federal agencies, and all interested stakeholders, including those listed under Subsection (e)(1) of this

section. The recovery implementation program shall be developed for the species that are:

- (1) listed as threatened or endangered species under federal law; and
- (2) associated with the aquifer.

(b) The authority shall enter into a memorandum of agreement with the United States Fish and Wildlife Service, other appropriate federal agencies, the Texas Commission on Environmental Quality, the Parks and Wildlife Department, the Department of Agriculture, the Texas Water Development Board, and other stakeholders, not later than December 31, 2007, in order to develop a program document that may be in the form of a habitat conservation plan used in issuance of an incidental take permit as outlined in Subsection (d) of this section.

(c) The authority shall enter into an implementing agreement with the United States Fish and Wildlife Service, other appropriate federal agencies, the Texas Commission on Environmental Quality, the Parks and Wildlife Department, the Department of Agriculture, the Texas Water Development Board, and other stakeholders to develop a program document that may be in the form of a habitat conservation plan used in issuance of an incidental take permit as outlined in Subsection (d) of this section not later than December 31, 2009.

(d) The authority, the Texas Commission on Environmental Quality, the Parks and Wildlife Department, the Department of Agriculture, the Texas Water Development Board, and other stakeholders shall jointly prepare a program document that may be in the form of a habitat conservation plan used in issuance of an incidental take permit with the United States secretary of the interior, through the United States Fish and Wildlife Service and other appropriate federal agencies, under Section 4 or Section 6, Endangered Species Act of 1973 (16 U.S.C. Section 1533 or 1535), as applicable, based on the program developed under Subsection (a) of this section. The program document shall:

(1) provide recommendations for withdrawal adjustments based on a combination of spring discharge rates of the San Marcos and Comal Springs and levels at the J-17 and J-27 wells during critical periods to ensure that federally listed, threatened, and endangered species associated with the Edwards Aquifer will be protected at all times, including throughout a repeat of the drought of record;

(2) include provisions to pursue cooperative and grant funding to the extent available from all state, federal, and other sources for eligible programs included in the cooperative agreement under Subsection (c) of this section, including funding for a program director; and

(3) be approved and executed by the authority, the Texas Commission on Environmental Quality, the Parks and Wildlife Department, the Department of Agriculture, the Texas Water Development Board, and the United States Fish and Wildlife Service not later than September 1, 2012, and the agreement shall take effect December 31, 2012.

(e) Texas A&M University shall assist in the creation of a steering committee to oversee and assist in the development of the cooperative agreement under Subsection (c) of this section. The steering committee must be created not later than September 30, 2007. The initial steering committee shall be composed of:

(1) a representative of each of the following entities, as appointed by the governing body of that entity:

- (A) the Edwards Aquifer Authority;
- (B) the Texas Commission on Environmental Quality;
- (C) the Parks and Wildlife Department;
- (D) the Department of Agriculture;
- (E) the Texas Water Development Board;

- (H) the San Antonio River Authority;
- (I) the South Central Texas Water Advisory Committee;
- (J) Bexar County;
- (K) CPS Energy; and
- (L) Bexar Metropolitan Water District or its successor; and

(2) nine other persons who respectively must be:

(A) a representative of a holder of an initial regular permit issued to a retail public utility located west of Bexar County, to be appointed by the authority;

(B) a representative of a holder of an initial regular permit issued by the authority for industrial purposes, to be appointed by the authority;

(C) a representative of a holder of an industrial surface water right in the Guadalupe River Basin, to be appointed by the Texas Commission on Environmental Quality;

(D) a representative of a holder of a municipal surface water right in

the Guadalupe River Basin, to be appointed by the Texas Commission on Environmental Quality;

(E) a representative of a retail public utility in whose service area the Comal Springs or San Marcos Springs is located;

(F) a representative of a holder of an initial regular permit issued by the authority for irrigation, to be appointed by the commissioner of agriculture;

(G) a representative of an agricultural producer from the Edwards Aquifer region, to be appointed by the commissioner of agriculture;

(H) a representative of environmental interests from the Texas Living Waters Project, to be appointed by the governing body of that project; and

(I) a representative of recreational interests in the Guadalupe River Basin, to be appointed by the Parks and Wildlife Commission.

(f) The steering committee shall work with Texas A&M University to:

(1) establish a regular meeting schedule and publish that schedule to encourage public participation; and

(2) not later than October 31, 2007, hire a program director to be housed at Texas A&M University.

(g) Texas A&M University may accept outside funding to pay the salary and expenses of the program director hired under this section and any expenses associated with the university's participation in the creation of the steering committee or subcommittees established by the steering committee.

(h) Where reasonably practicable or as required by law, any meeting of the steering committee, the Edwards Aquifer area expert science subcommittee, or another subcommittee established by the steering committee must be open to the public.

(i) The steering committee appointed under this section shall appoint an Edwards Aquifer area expert science subcommittee not later than December 31, 2007. The expert science subcommittee must be composed of an odd number of not fewer than seven or more than 15 members who have technical expertise regarding the Edwards Aquifer system, the threatened and endangered species that inhabit that system, springflows, or the development of withdrawal limitations. The Bureau of Economic Geology of The University of Texas at Austin and the River Systems Institute at Texas State University shall assist the expert science subcommittee. Chapter 2110, Government Code, does not apply to the size, composition, or duration of the expert science subcommittee.

(j) The Edwards Aquifer area expert science subcommittee shall, among other things,

analyze species requirements in relation to spring discharge rates and aquifer levels as a function of recharge and withdrawal levels. Based on that analysis and the elements required to be considered by the authority under Section 1.14 of this article, the expert science subcommittee shall, through a collaborative process designed to achieve consensus, develop recommendations for withdrawal reduction levels and stages for critical period management including, if appropriate, establishing separate and possibly different withdrawal reduction levels and stages for critical period management for different pools of the aquifer needed to maintain target spring discharge and aquifer levels. The expert science subcommittee shall submit its recommendations to the steering committee and all other stakeholders involved in the recovery implementation program under this section.

(k) The initial recommendations of the Edwards Aquifer area expert science subcommittee must be completed and submitted to the steering committee and other stakeholders not later than December 31, 2008, and should include an evaluation:

(1) of the option of designating a separate San Marcos pool, of how such a designation would affect existing pools, and of the need for an additional well to measure the San Marcos pool, if designated;

(2) of the necessity to maintain minimum springflows, including a specific review of the necessity to maintain a flow to protect the federally threatened and endangered species; and

(3) as to whether adjustments in the trigger levels for the San Marcos Springs flow for the San Antonio pool should be made.

(l) In developing its recommendations, the Edwards Aquifer area expert science subcommittee shall:

(1) consider all reasonably available science, including any Edwards Aquifer-specific studies, and base its recommendations solely on the best science available; and

(2) operate on a consensus basis to the maximum extent possible.

(m) After development of the cooperative agreement, the steering committee, with the assistance of the Edwards Aquifer area expert science subcommittee and with input from the other recovery implementation program stakeholders, shall prepare and submit recommendations to the authority. The recommendations must:

(1) include a review of the critical period management plan, to occur at least once every five years;

(2) include specific monitoring, studies, and activities that take into account changed conditions and information that more accurately reflects the importance of critical period management; and

(3) establish a schedule for continuing the validation or refinement of the critical period management plan adopted by the authority and the strategies to achieve the program and cooperative agreement described by this section.

(n) In this subsection, “recharge facility” means a dam, reservoir, or other method of recharge project and associated facilities, structures, or works but does not include facilities designed to recirculate water at Comal or San Marcos Springs. The steering committee shall establish a recharge facility feasibility subcommittee to:

(1) assess the need for the authority or any other entity to own, finance, design, construct, operate, or maintain recharge facilities;

(2) formulate plans to allow the authority or any other entity to own, finance, design, construct, operate, or maintain recharge facilities;

(3) make recommendations to the steering committee as to how to calculate the amount of additional water that is made available for use from a recharge project including during times of critical period reductions;

(4) maximize available federal funding for the authority or any other entity to own, finance, design, construct, operate, or maintain recharge facilities; and

(5) evaluate the financing of recharge facilities, including the use of management fees or special fees to be used for purchasing or operating the facilities.

(o) The steering committee may establish other subcommittees as necessary, including a hydrology subcommittee, a community outreach and education subcommittee, and a water supply subcommittee.

If the steering committee is dissolved, the program director hired under Subsection (f) of this section shall assume the duties of the steering committee.

(q) The authority shall provide an annual report to the governor, lieutenant governor, and speaker of the house of representatives not later than January 1 of each year that details:

(1) the status of the recovery implementation program development process;

The authority may not allow for any person to construct, acquire, or own facilities for transporting groundwater out of Uvalde County or Medina County.

(c) Bonds issued by the authority are subject to review and approval of the attorney general and the commission. If the attorney general finds that the bonds have been authorized in accordance with the law, the attorney general shall approve them, and the comptroller of public accounts shall register the bonds. SECTION 1.29 FEES.

(a) *Repealed by Act of May 28, 2007, 80th Leg., R.S., ch. 1351, § 2.09, 2007 Tex. Gen. Laws 4612, 4634; Act of May 28, 2007, 80th Leg., R.S., ch. 1430, § 12.09, 2007 Tex. Gen. Laws 5848, 5908.*

(b) The authority shall assess equitable aquifer management fees based on aquifer use under the water management plan to finance its administrative expenses and programs authorized under this article. Each water district governed by Chapter 36, Water Code, that is within the authority's boundaries may contract with the authority to pay expenses of the authority through taxes in lieu of user fees to be paid by water users in the district. The contract must provide that the district will pay an amount equal to the amount that the water users in the district would have paid through user fees. The authority may not collect a total amount of fees and taxes that is more than is reasonably necessary for the administration of the authority. The authority may not increase aquifer management fees by more than eight percent per year.

(c) *Repealed by Act of May 28, 2007, 80th Leg., R.S., ch. 1351, § 2.09, 2007 Tex. Gen. Laws 4612, 4634; Act of May 28, 2007, 80th Leg., R.S., ch. 1430, § 12.09, 2007 Tex. Gen. Laws 5848, 5908.*

(e) In developing an equitable fee structure under this section, the authority may establish different fee rates on a per acre-foot basis for different types of use. The fees must be equitable between types of uses. The fee rate for agricultural use shall be based on the volume of water withdrawn and may not be more than \$2 per acre-foot. The authority shall assess the fees on the amount of water a permit holder is authorized to withdraw under the permit.

(f) The authority may impose a permit application fee not to exceed \$25. The authority may impose fees to recover administrative costs associated with actions other than the filing and processing of applications and registrations. The fees may not unreasonably exceed the administrative costs.

(g) The authority may impose a registration application fee not to exceed \$10.

(h) Fees assessed by the authority may not be used to fund the cost of reducing withdrawals or retiring permits or of judgments or claims related to withdrawals or permit retirements.

(i) The authority and other stakeholders, including state agencies, listed under Section 1.26A of this article shall provide money as necessary to finance the activities of the steering committee and any subcommittees appointed by the steering committee and the program director of the recovery implementation program under Section 1.26A of this article. The authority shall provide, as necessary, up to \$75,000 annually, adjusted for changes in the consumer price index, to finance the South Central Texas Water Advisory Committee's administrative expenses and programs authorized under this article.

SECTION 1.30 RIVER DIVERSIONS.

(a) The commission may issue to an applicant a special permit to divert water from the Guadalupe River from a diversion point on the river downstream of the point where the river emerges as a spring.

(b) A permit issued to a person under this section must condition the diversion of water from the Guadalupe River on a limitation of withdrawals under the person's permit to withdraw water from the aquifer.

(c) A permit issued under this section must provide that the permit holder may divert water from the Guadalupe River only if:

(1) the diversion is made instead of a withdrawal from the aquifer to enhance the yield of the aquifer; and

(2) the diversion does not impair senior water rights or vested riparian rights.

(d) A permit issued in accordance with this section is subordinate to permitted water rights for which applications were submitted before May 31, 1993, and vested riparian rights.

(e) Sections 11.028 and 11.033, Water Code, do not apply to a permit issued under this section.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.30, 1993 Tex. Gen. Laws 2350, 2365.

SECTION 1.31 MEASURING DEVICES.

(a) The owner of a nonexempt well that withdraws water from the aquifer shall install and maintain a measuring device approved by the authority designed to indicate the flow rate and cumulative amount of water withdrawn by that well. This requirement may be waived by the authority on written request by a well owner to use an alternative method of determining the amount of water withdrawn.

(b) The authority is responsible for the costs of purchasing, installing, and maintaining measuring devices, if required, for an irrigation well in existence on September 1, 1993.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.31, 1993 Tex. Gen. Laws 2350, 2365.

SECTION 1.32 REPORTS.

Not later than March 1 of each year, and on a form prescribed by the authority, each holder of a permit shall file with the authority a written report of water use for the preceding calendar year.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.32, 1993 Tex. Gen. Laws 2350, 2366.

SECTION 1.33 WELL METERING AND PERMITTING EXEMPTIONS.

(a) A well that produces 25,000 gallons of water a day or less for domestic or livestock use is exempt from metering requirements.

(b) Exempt wells must register with the authority or with an underground water conservation district in which the well is located.

(c) A well serving a subdivision requiring platting does not qualify for an exempt use.

(d) A well drilled on or before June 1, 2013, for any purpose authorized under this article is exempt from the requirement to obtain a withdrawal permit provided that the well:

(1) is not capable of producing more than 1,250 gallons of water a day; or

(2) is metered and does not produce more than 1.4 acre-feet of water in a calendar year.

(e) In addition to permitted withdrawals from the aquifer, a municipally owned utility owned by the City of San Antonio, without a permit, may withdraw groundwater from the aquifer if:

(1) the utility uses the groundwater to supply a military installation with water

for human consumption, irrigation, operations, mission support, or infrastructure maintenance;

(2) the utility and the military installation enter into a contract requiring the installation to reduce its groundwater withdrawals from the aquifer by the same amount of withdrawn water the installation receives from the utility; and

(3) the utility complies with rules adopted by the authority that allow the authority to monitor groundwater withdrawals from the aquifer by the utility and determine amounts of groundwater exempted from permitting in accordance with this subsection, including rules requiring the reporting of amounts supplied by the utility to the military installation and amounts by which the military installation reduces the installation's groundwater withdrawals from the aquifer.

(f) Subsection (e) of this section does not alter the obligations of a military installation under a biological opinion issued by a federal agency.

(g) The amount of water provided by a municipally owned utility to a military installation under Subsection (e) of this section may not exceed the maximum amount of water that the military installation is authorized to withdraw from the aquifer under a biological opinion issued by a federal agency.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.33, 1993 Tex. Gen. Laws 2350, 2366; as amended by Act of May 20, 2013, 83d Leg., R.S., ch. 783, 2013 Tex. Gen. Laws 1998-99; Act of May 31, 2021, 87th Leg., R.S., ch. , § 2, Sec. 1.33(e), (f), (g), 2021 Tex. Gen. Laws .

SECTION 1.34 TRANSFER OF RIGHTS.

(a) In this section:

(1) “Developed land” means historically irrigated land that has been physically altered by the installation of utilities or construction of roads, parking lots, driveways, foundations, structures, buildings, stormwater collection systems, public parks, or athletic fields or by similar improvements.

(2) “Historically irrigated land” means land irrigated during the historical period, as described by Section 1.16 of this Act, that provided the basis for the issuance of an initial regular permit for irrigation use and is identified as the place of use in the initial regular permit.

(3) “Land no longer practicable to farm” means historically irrigated land:

(A) that has not been irrigated for more than five years; and

(B) for which the owner of the land has submitted to the authority documentation demonstrating that because of development on land in close

proximity to the historically irrigated land, agricultural activities performed on the land, including crop dusting or other applications of pesticides, have the potential to compromise the health and safety of a farm operator or of persons occupying or residing on property in close proximity to the land.

(b) Water withdrawn from the aquifer must be used within the boundaries of the authority.

(c) The authority by rule may establish a procedure by which a person who installs water conservation equipment may sell the water conserved.

(d) Except as otherwise provided by this section, a permit holder may lease permitted water rights, but a holder of a permit for irrigation use may not lease more than 50 percent of the irrigation rights initially permitted. The user's remaining irrigation water rights must be used in accordance with the original permit and must pass with transfer of the irrigated land.

(e) Subject to approval by the authority, the owner of historically irrigated land may sever all or a portion of the remaining water rights for the historically irrigated land which has become developed land in the same proportion as the proportion of developed land and undeveloped land or for which the owner of the historically irrigated land has demonstrated that all or a portion of the land is land no longer practicable to farm. Water rights used for irrigation tied to a portion of land that cannot be developed because of its topography or its location in a floodplain may be included in the proportion of land considered developed land. Water rights for use in irrigation severed under this subsection may change in purpose or place of use. Rules adopted to implement this subsection may not expand the type of land considered developed land or land considered land no longer practicable to farm. The approval of a severance under this section is subject to a contested case hearing in accordance with authority rules.

(f) The authority may adopt rules to provide for a holder of an initial regular permit for use in irrigation to lease all or part of the water rights for use in irrigation granted in the initial permit to another person for irrigating land, including land not described in the initial regular permit, located in the authority. Rules adopted under this subsection may allow the holder of an initial regular permit to use the water rights temporarily for irrigation at a location other than the land described in the initial regular permit.

(b) A person holding a permit issued by the authority may not violate the terms or conditions of the permit.

- (c) A person may not waste water withdrawn from the aquifer.
- (d) A person may not pollute or contribute to the pollution of the aquifer.
- (e) A person may not violate this article or a rule of the authority adopted under this article.

- (a) The authority may enter orders to enforce the terms and conditions of permits, orders, or rules issued or adopted under this article.
- (b) The authority by rule shall provide for the suspension of a permit of any class for a failure to pay a required fee or a violation of a permit condition or order of the authority or a rule adopted by the authority.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.36, 1993 Tex. Gen. Laws 2350, 2366.

SECTION 1.361 OPEN OR UNCOVERED WELLS.

(a) If the owner or lessee of land on which an open or uncovered well is located fails or refuses to close or cap the well in compliance with Chapter 1901, Occupations Code, and the authority's rules:

- (1) the authority may take enforcement action as authorized by this article to require the owner or lessee to close or cap the well; or
- (2) a person, firm, or corporation employed by the authority may go on the land and close or cap the well safely and securely.

(b) Reasonable expenses incurred by the authority in closing or capping a well constitute a lien on the land on which the well is located.

(c) The lien described by Subsection (b) arises and attaches on recordation of, in the deed records of the county where the well is located, an affidavit executed by any person conversant with the facts stating the following:

- (1) the existence of the well;
- (2) the legal description of the property on which the well is located;
- (3) the approximate location of the well on the property;
- (4) the failure or refusal of the owner or lessee, after notification, to close or

cap the well before the expiration of 10 days after the notification;

(5) the closing or capping of the well by the authority, or by an authorized agent, representative, or employee of the authority; and

(6) the expense incurred by the authority in closing or capping the well.

SECTION 1.37 ADMINISTRATIVE PENALTY.

(a) The authority may assess an administrative penalty against a person who violates this article or a rule adopted or order issued under this article in an amount of not less than \$100 or more than \$1,000 for each violation and for each day of a continuing violation.

(b) In determining the amount of the penalty, the authority shall consider:

(1) the history of previous violations;

(2) the amount necessary to deter future violations;

(3) efforts to correct the violation;

(4) enforcement costs relating to the violation; and

(5) any other matters that justice may require.

(c) If after an examination of the facts the authority concludes that the person did commit a violation, the authority may issue a preliminary report stating the facts on which it based its conclusion, recommending that an administrative penalty under this section be imposed, and recommending the amount of the proposed penalty.

(d) The authority shall give written notice of the report to the person charged with committing the violation. The notice must include a brief summary of the facts, a statement of the amount of the recommended penalty, and a statement of the person's right to an informal review of the occurrence of the violation, the amount of the penalty, or both.

(e) Not later than the 10th day after the date on which the person charged with committing the violation receives the notice, the person may either give the authority written consent to the report, including the recommended penalty, or make a written request for an informal review by the authority.

(f) If the person charged with committing the violation consents to the penalty

recommended by the authority or fails timely to request an informal review, the authority shall assess the penalty. The authority shall give the person written notice of its action. The person shall pay the penalty not later than the 30th day after the date on which the person receives the notice.

(g) If the person charged with committing a violation requests an informal review as provided by Subsection (e) of this section, the authority shall conduct the review. The authority shall give the person written notice of the results of the review.

(h) Not later than the 10th day after the date on which the person charged with committing the violation receives the notice prescribed by Subsection (g) of this section, the person may make to the authority a written request for a hearing.

(i) If, after informal review, a person who has been ordered to pay a penalty fails to request a formal hearing in a timely manner, the authority shall assess the penalty. The authority shall give the person written notice of its action. The person shall pay the penalty not later than the 30th day after the date on which the person receives the notice.

(j) Before the expiration of 30 days after the date the authority's order is final as provided by Section 2001.144(a), Government Code, the person shall:

(1) pay the amount of the penalty;

(2) pay the amount of the penalty and file a petition for judicial review contesting the occurrence of the violation, the amount of the penalty, or both the occurrence of the violation and the amount of the penalty; or

(3) without paying the amount of the penalty, file a petition for judicial review contesting the occurrence of the violation, the amount of the penalty, or both the occurrence of the violation and the amount of the penalty.

(k) Within the 30-day period, a person who acts under Subdivision (3) of Subsection (j) of this section may:

(1) stay enforcement of the penalty by:

(A) paying the amount of the penalty to the court for placement in an escrow account; or

(B) giving to the court a supersedeas bond approved by the court for the amount of the penalty and that is effective until all judicial review of the authority's order is final; or

(2) request the court to stay enforcement of the penalty by:

(A) filing with the court a sworn affidavit of the person stating that the

person is financially unable to pay the amount of the penalty and is financially unable to give the supersedeas bond; and

(B) giving a copy of the affidavit to the authority by certified mail.

(l) If the authority receives a copy of an affidavit under Subdivision (2) of Subsection (k) of this section, it may file with the court within five days after the date the copy is received a contest to the affidavit. The court shall hold a hearing on the facts alleged in the affidavit as soon as practicable and shall stay the enforcement of the penalty on finding that the alleged facts are true. The person who files an affidavit has the burden of proving that the person is financially unable to pay the amount of the penalty and to give a supersedeas bond.

(m) If the person does not pay the amount of the penalty and the enforcement of the penalty is not stayed, the authority may refer the matter to the attorney general for collection of the amount of the penalty.

(n) Judicial review of the order of the authority:

(1) is instituted by filing a petition as provided by Subchapter G, Chapter 2001, Government Code; and

(2) is under the substantial evidence rule.

(o) If the court sustains the occurrence of the violation, the court may uphold or reduce the amount of the penalty and order the person to pay the full or reduced amount of the penalty. If the court does not sustain the occurrence of the violation, the court shall order that no penalty is owed.

(p) When the judgment of the court becomes final, the court shall proceed under this subsection. If the person paid the amount of the penalty and if that amount is reduced or is not upheld by the court, the court shall order that the appropriate amount plus accrued interest be remitted to the person. The rate of the interest is the rate charged on loans to depository institutions by the New York Federal Reserve Bank, and the interest shall be paid for the period beginning on the date the penalty was paid and ending on the date the penalty is remitted. If the person gave a supersedeas bond and if the amount of the penalty is not upheld by the court, the court shall order the release of the bond. If the person gave a supersedeas bond and if the amount of the penalty is reduced, the court shall order the release of the bond after the person pays the amount.

(q) A penalty collected under this section shall be remitted to the authority.

(r) All proceedings under this section are subject to Chapter 2001, Government Code.

(a) The authority may file a civil suit in a state district court for an injunction or mandatory injunction to enforce this article and the authority's rules. The authority may recover reasonable attorney fees in a suit under this section.

(b) In an enforcement action by the authority against a governmental entity for a violation of authority rules, the limits on the amount of fees, costs, and penalties that the authority may impose under this section constitute a limit of liability of the governmental entity for the violation. This subsection does not prohibit the recovery by the authority of fees and costs under this article in an action against a governmental entity.

(a) Chapter 99, Acts of the 56th Legislature, Regular Session, 1959 (Article 8280-219, Vernon's Texas Civil Statutes), is repealed, and the Edwards Underground Water District is abolished.

(b) All files and records of the Edwards Underground Water District pertaining to control, management, and operation of the district are transferred from the Edwards Underground Water District to the authority on the effective date of this article.

(c) All real and personal property, leases, rights, contracts, staff, and obligations of the Edwards Underground Water District are transferred to the authority on the effective date of this article.

(d) On September 1, 1993, all unobligated and unexpended funds of the Edwards Underground Water District shall be transferred to the authority.

(e) *Repealed by Act of May 27, 2001, 77th Leg., R.S., ch. 966, § 6.03, 2001 Tex. Gen. Laws 1991, 2075.*

SECTION 1.42 EFFECT ON OTHER DISTRICTS.

(a) An underground water conservation district other than the authority may manage and control water that is a part of the aquifer after the effective date of this article only as provided in this section. This article does not affect a water reclamation or conservation district that manages and controls only water from a resource other than the aquifer.

(b) An underground water conservation district other than the authority may manage and control water that is a part of the aquifer to the extent that those management activities do not conflict with and are not duplicative of this article or the rules and orders of the authority.

(c) Except as otherwise provided by this article, the board may delegate the powers and duties granted to it under this article. The board shall delegate all or part of its powers or duties to an underground water conservation district on the district's request if the district demonstrates to the satisfaction of the board that:

(1) the district has statutory powers necessary for full enforcement of the rules and orders to be delegated;

(2) the district has implemented all rules and policies necessary to fully

implement the programs to be delegated; and

(3) the district has implemented a system designed to provide the authority with adequate information with which to monitor the adequacy of the district's performance in enforcing board rules and orders.

(d) In making the determination under Subsection (c) of this section, the board may consider the district's past performance and experience in enforcing powers and duties delegated to it by the board. The board may deny a request for delegation of powers or duties by a district if the district has previously had a delegation terminated under Subsection (e) of this section.

(e) If the authority determines that a district has failed adequately to enforce or implement any rules or orders delegated under this section, the authority immediately shall provide to the district notice that sets forth the reasons for its determination and the actions that the district must take to retain the delegated authority. Not later than the 10th day after the date the notice is given, the district must demonstrate its commitment and ability to take the actions set forth in the notice. If, at the end of the 10-day period, the authority does not find that the district will adequately enforce its rules and orders, the authority immediately shall resume full responsibility for implementation and enforcement of those rules and orders. The authority shall provide to the district notice that the delegation of authority to it has been terminated. After the termination notice is given, the authority of the district to manage or control water in the aquifer is limited to the authority granted by Subsection (b) of this section.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.42, 1993 Tex. Gen. Laws 2350, 2368-69.

SECTION 1.43 CREATION OF UNDERGROUND WATER CONSERVATION DISTRICT.

An underground water conservation district may be created in any county affected by this article as provided by Subchapter B, Chapter 52, Water Code.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.43, 1993 Tex. Gen. Laws 2350, 2369.

SECTION 1.44 COOPERATIVE CONTRACTS FOR ARTIFICIAL RECHARGE.

(a) The authority may contract with any political subdivision of the state under Chapter 791, Government Code, to provide for artificial recharge of the aquifer, through injection wells or with surface water subject to the control of the political subdivision, for the subsequent retrieval of the water by the political subdivision or its authorized assignees for beneficial use within the authority.

(b) The authority may not unreasonably deny a request to enter into a cooperative contract under this section if the political subdivision agrees to:

(1) file with the authority records of the injection or artificial recharge of the aquifer; and

(2) provide for protection of the quality of the aquifer water and of the rights of aquifer users in designating the location of injection wells or recharge dams, the methods of injection or recharge, and the location and type of retrieval wells.

(c) Except as provided by Subsection (c-1), the political subdivision causing artificial recharge of the aquifer is entitled to withdraw during any 12-month period the measured amount of water actually injected or artificially recharged during the preceding 12-month period, as demonstrated and established by expert testimony, less an amount determined by the authority to:

(1) account for that part of the artificially recharged water discharged through springs; and

(2) compensate the authority in lieu of users' fees.

(c-1) A political subdivision or municipally owned utility causing artificial recharge of a portion of the aquifer that contains groundwater with a total dissolved solids concentration of more than 5,000 milligrams per liter is entitled to withdraw the measured amount of water actually injected or artificially recharged.

(d) The amounts of water withdrawn under this section are not subject to the maximum total permitted withdrawals provided by Section 1.14 of this article.

(e) The authority may contract for injection or artificial recharge under this section only if provision is made for protecting and maintaining the quality of groundwater in the receiving part of the aquifer, and:

(1) the water used for artificial recharge is groundwater withdrawn from the aquifer;

(2) the water is recharged through a natural recharge feature; or

(3) the water is injected by a municipally owned utility owned by the City of New Braunfels, and:

(A) the water has a total dissolved solids concentration of less than 1,500 milligrams per liter and is not domestic wastewater, municipal wastewater, or reclaimed water as those terms are defined by 30 T.A.C. Chapter 210, effective October 31, 2018;

(B) the injection well terminates in a portion of the aquifer that contains groundwater with a total dissolved solids concentration of more than 5,000 milligrams per liter; and

(C) if the water injected is state water, the utility has a water right or

contract for use of the water that does not prohibit use of the water in an aquifer storage and recovery project.

(e-1) The injection or withdrawal of water under Subsection (c-1) or (e)(3) must comply with requirements imposed under Subchapter G, Chapter 27, Water Code.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.44, 1993 Tex. Gen. Laws 2350, 2369-70; as amended by Act of May 27, 2001, 77th Leg., R.S., ch. 966, § 2.62, 2001 Tex. Gen. Laws 1991, 2022; Act of May 25, 2019, 86th Leg., R.S., ch. 585, § 1, 2019 Tex. Gen. Laws 1633, 1633-34.

SECTION 1.45 RECHARGE DAMS.

(a) The authority may own, finance, design, construct, operate, and maintain recharge dams and associated facilities, structures, or works in the contributing or recharge area of the aquifer if the recharge is made to increase the yield of the aquifer, the recharge project does not impair senior water rights or vested riparian rights, and the recharge project is not designed to recirculate water at Comal or San Marcos Springs.

(b) The commission shall determine the historic yield of the floodwater to the Nueces River basin. The historic yield is equal to the lesser of:

- (1) the average annual yield for the period from 1950 to 1987; or
- (2) the annual yield for 1987.

(c) Only the amount of floodwater in excess of the historic yield as determined by the commission may be impounded by a recharge dam built or operated under this section.

Act of May 30, 1993, 73d Leg., R.S., ch. 626, § 1.44, 1993 Tex. Gen. Laws 2350, 2370; as amended by Act of May 28, 2007, 80th Leg., R.S., ch. 1351, § 2.08, 2007 Tex. Gen. Laws 4612, 4634; Act of May 28, 2007, 80th Leg., R.S., ch. 1430, § 12.08, 2007 Tex. Gen. Laws 5848, 5908.

SECTION 1.46 SUITS.

(a) A person, firm, corporation, or association of persons affected by and dissatisfied with any provision or with any rule or order made by the authority is entitled to file a suit against the authority or its directors to challenge the validity of the law, rule, or order.

(b) Only the authority, the applicant, and parties to a contested case hearing may participate in an appeal of a decision on the application that was the subject of that contested case hearing. An appeal of a decision on a permit application must include the applicant as a necessary party.

(c) A suit under this section must be filed in a court of competent jurisdiction in any county in which the authority is located. The suit may be filed only after all administrative appeals to the authority are final.

(d) The burden of proof is on the petitioner, and the challenged law, rule, order, or act is to be considered prima facie valid. The review on appeal is governed by either Section 2001.038 or Section 2001.174, Government Code, as appropriate.

(e) The authority may recover attorney's fees, costs for expert witnesses, and other costs incurred by the authority before the court on the same basis as Chapter 36, Water Code, provides for a groundwater conservation district to recover those fees and costs.

Act of May 23, 2019, 86th Leg., R.S., ch. 1135, § 12, § 1.46, 2019 Tex. Gen. Laws 3213, 3217.
